FREE S.E.O. AND INTERNET MARKETING TOOLS

Your package include, **FREE SEO Software**, article submission software, directory submission software, article extractor software and much, much more

Online and offline Optimization of your website with free affiliate tools

This Manual Shows You Why Affiliate Marketing Tools Are An Absolute Necessity For Your Success In Affiliate or Online Marketing

So you want to take that plunge into cyberspace not only as a visitor but as the owner of your own website and internet business because you've heard that it is possible to earn tons of cash on the internet. This is absolutely true. And maybe you have taken the first steps and want to do more, but you are not sure how to do it, what it's going to cost. Perhaps you are already an accomplished cybernaut, but the features, functions, and visibility of your web site didn't fit your budget, so I'm here to help.

We all want to take the inexpensive route, and believe me there is no shame in getting something for nothing especially when other people dig deep into their pockets to accomplish the very same thing.

Before we get started I would like to tell you a little bit about this ebook and my experience with Internet marketing. I have been doing affiliate marketing for a little over 18 months now.

I had been involved in MLM projects for years with very little or no success at all, trying this product, joining this company, and eventually dropping it to start something new. Only recently through affiliate marketing has my success in Internet (MLM) grown to what it is now. But my first months as an affiliate marketer were not very pretty. I'm sure that my net profit was minus a few thousand bucks.

To be truthful, I had no idea about what I was doing. I had purchased various guides and tools and read about the different ways people were making money online. But I never could get the hang of it.

What kept me motivated was the fact that I know that people were making excellent incomes working online. I knew it was possible, only thing that I had to figure out was the right way to go about doing it.

During my struggles with Adwords I came across several e-books which helped me a lot. After getting some tips from them and from the different (Guru) news letters which I had sign up for, I slowly watched my progress improve as I continued to learn more.

After a while I noticed that the vast majority of affiliates seem to be going broke rather quickly, (not just beginners) and only a few were earning big bucks, so I had to find out what they were doing that the others weren't.

I noticed from watching these guys that they were very selective about which products they marketed, they seem to know when to push a product and when to start a Adwords campaign. Product selection is very important for affiliate marketing.

Finally after about 8 months of trial and error and copying the best I actually made a profit of about \$126.75 Can you imagine the joy upon receiving your first cheque from CickBank? from that moment on it was, full steam **ahheead!!!!**.

This marked a huge turning point in my online ventures, and I could really see the huge potential in affiliate marketing.

So let's get started.

Why do you need affiliate marketing tools????

There are many tools out there that are absolutely necessary to conduct online marketing, some are very expensive, others less expensive, and some are free.

But remember when I say tools I am also referring to ebooks as well, and without such tools as Search Engine Optimization Software instance, you just cannot get your online business running the way you planned, it just won't happen.

Free Affiliate Tools provide you with all the necessary tools that you will need in the beginning stages of your business to help you build your keyword list write articles, submit articles, create your own PDF files and much, much more.

A collection of the most important affiliate tools that you will need if you are planning on working online in any way shape form of or fashion.

But if you are new to the game you will not know how to find these tools, and your experience as a marketer will not be pleasant.

I take for granted that you are serious and determined to be successful because you have already made a big step and that was to purchase this e-book. But if you don't, have determination, then I suggest that you stop reading this right now.

But if work does' scare you, and you have the time, then carry on..... one thing is for sure, once you have everything in place and have started your business, you can sit back relax and watch the Rubbles roll in.

There are many FREE TOOLS available to help you in your efforts to become successful in your online ventures. As an affiliate these tools are absolutely necessary-But remember free is not always good- after you get yourself situated you can think about other options which I'm sure you will want to explore.

But in the meantime, in between time, you can use these free tools and they will help you accomplish your goal quicker.

There are many, many tools out there to help you . the problem is finding them, that's why we decided to write this ebook to give you that extra edge which all beginning marketers need and the tools to survive in this arena.

We want to give you the affiliate tools that will be most beneficial to you and that you urgently need to get your copy and SEO Optimization quickly.

So let's look at some of these FREE TOOLS that you need...

TOOL # 1 ARTICLE EXTRACTOR

<http://latest-internet-marketing-tips.com/>

If you have been involved with Internet Marketing for more than 3 months, then you have probably heard the term: **Duplicate Content Penalty**. Don't get nailed using duplicate content because eventually your website rankings will drop like a rock. What to do? increasing your understanding of duplicate content and what you choose to do about it. And if you use Private Label Rights (PLR) articles and think that you are safe in 2007, then think again and keep reading...

If you are building a new website using articles that were submitted to an article directory a few months back, you are using *stale* (duplicate) content that is already being used on thousands of websites.

On-page optimization in 2007 will be top priority. Just focusing on *off-page* factors such as getting back links to your website will not be enough in 2007.

The appetite for quality web content is increasing, **duplicate content will not be accepted anymore 100% original content is BEST**. To Get great Content, You **MUST invest the time and address the fundamentals of SEO-Driven Content!**

This article extractor will help you create good copy for your website, and help you to write articles for your site that will get you top ranking in the search engines:

So think-how will I get my content together in 2007. A long term well-planned, well-1A executed strategy is what builds a long-term insanely successful business. **This tool is a necessity.**
